

# Environmental Policy

VGI Public Company Limited

Effective on 24 March 2020

*(English translation)*

**Environmental Policy**  
**VGI Public Company Limited**

VGI Public Company (the “**Company**”) recognizes importance of climate change which is one of the most significant global challenges of our living time. It is now more important than ever for every party including governments, businesses and individuals around the world to make immediate action. Here at the Company, we are committed to minimize impacts from our business operation on the environment while inspiring further climate change actions at the massive scale. Our key environmental focus areas are as follows:

**1) Water and energy consumption**

Improve water and energy efficiencies in existing operations. Invest in new technologies that enhance water and energy conservation

**2) Waste minimization**

Minimize waste in our operations and business activities. We aim to reduce waste by making circular economy the standard operating procedure

**3) Inspire platform**

The Company commits to publicize messages to help spread awareness about climate change through our advertising platform

This policy was effective on 24 March 2020
